1. Installation and execution

To install the app, just execute the following command in the root directory of the project: `java -jar EXE/form-builder.jar`

2. User manual

2.1 Log in view

When opening the program for the first time, you will see the following interface:

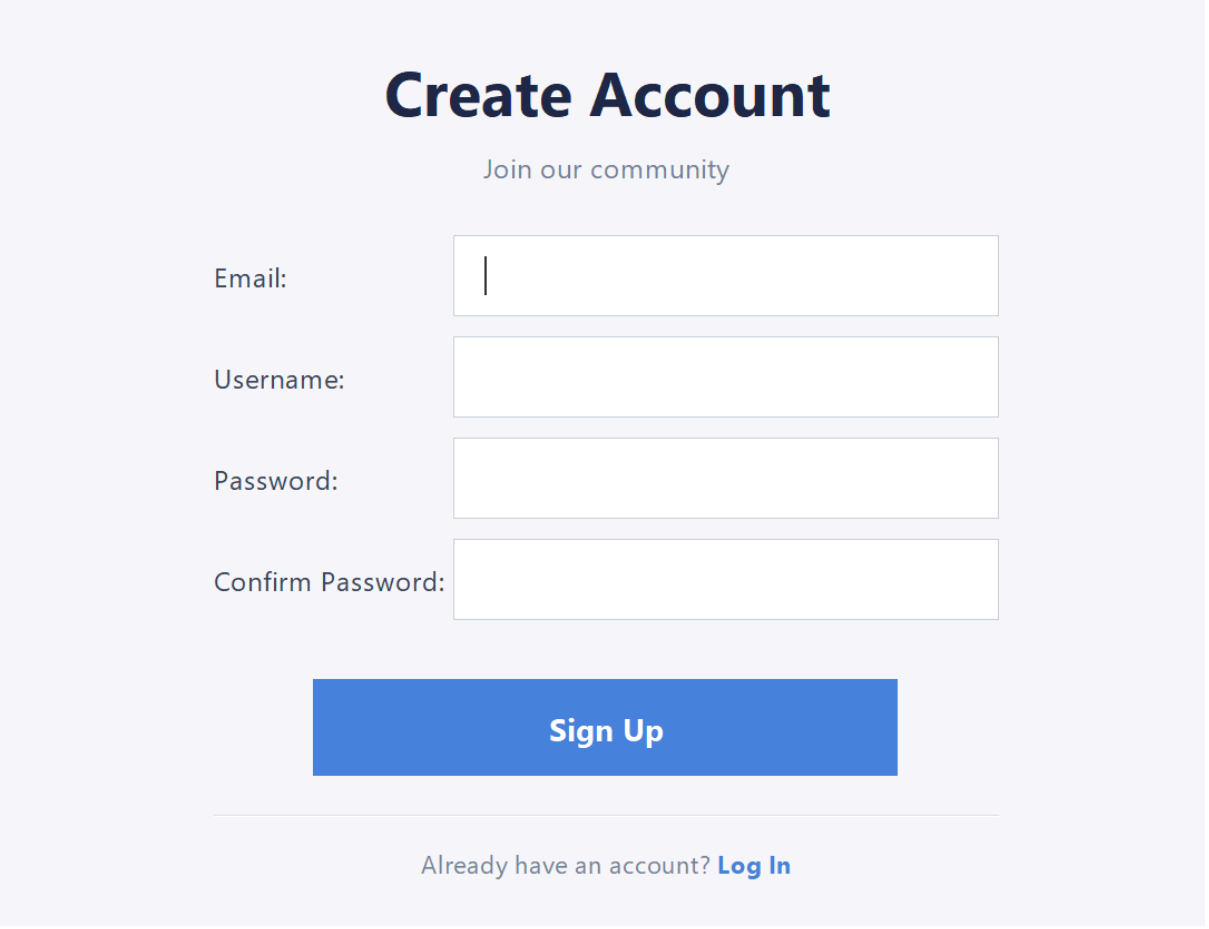

A screenshot of a web application's login interface. The window has a title bar with a small icon and the text "Login". The main content area has a light blue background. At the top, the word "Welcome" is displayed in a large, bold, dark blue font. Below it, the text "Access your account" is shown in a smaller, gray font. There are two input fields: "User ID:" with a white box containing a vertical cursor, and "Password:" with a white box. Below the input fields are two buttons: a solid blue "Log In" button and a white "Sign Up" button with a blue border. At the bottom, there is a link that says "Don't have an account? Enter as Guest" in a small, gray font, with "Enter as Guest" in blue.

Assuming it is the first time using the application, you have two options:

- Click "Sign Up" to create an account.
- Click "Enter as Guest" to log in with an anonymous user (please keep in mind that you will have limited functionality as you will not be able to create any form).

If you have already been registered, you may go ahead and log in with your User ID and password, and click "Log In".

2.2 Sign up view

The image shows a 'Create Account' sign-up form. At the top, the title 'Create Account' is in a large, bold, dark blue font. Below it, the subtitle 'Join our community' is in a smaller, grey font. The form consists of four input fields, each with a label to its left: 'Email:', 'Username:', 'Password:', and 'Confirm Password:'. The 'Email:' field has a vertical cursor inside. Below the input fields is a large blue button with the text 'Sign Up' in white. At the bottom, there is a link that says 'Already have an account? Log In'.

Create Account

Join our community

Email:

Username:

Password:

Confirm Password:

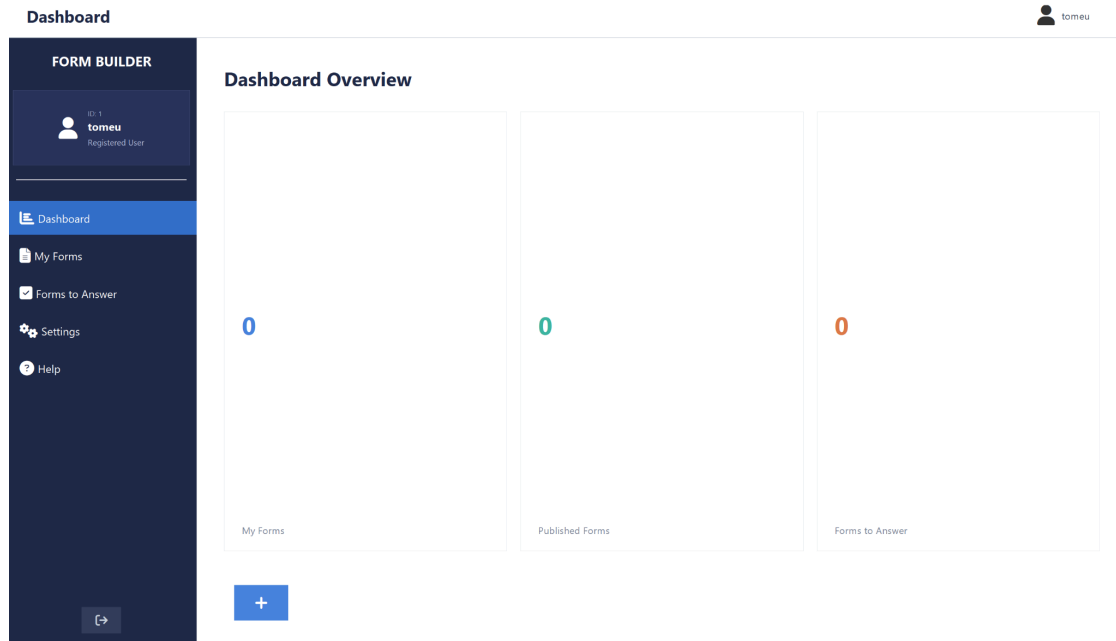

Sign Up

Already have an account? [Log In](#)

When registering, you will be asked for an Email, Username, Password and the confirmation of the Password as shown in the image above. Please be aware that Email should be valid and Password should have more than 8 characters and contain chars and numbers.

When all fields are filled, click “Sign Up” to register the user. You will be directed to the log in page, where you will have to log in (see 2.1 Log in view)

2.3 Main View

After logging in with your user id and password. You will access the main screen of the program, just as shown above. In this screen you will see the following information:

- My forms: number of forms that you own
- Published Forms: number of forms in the application (yours and owned by other users)
- Forms to Answer: number of forms available to answer

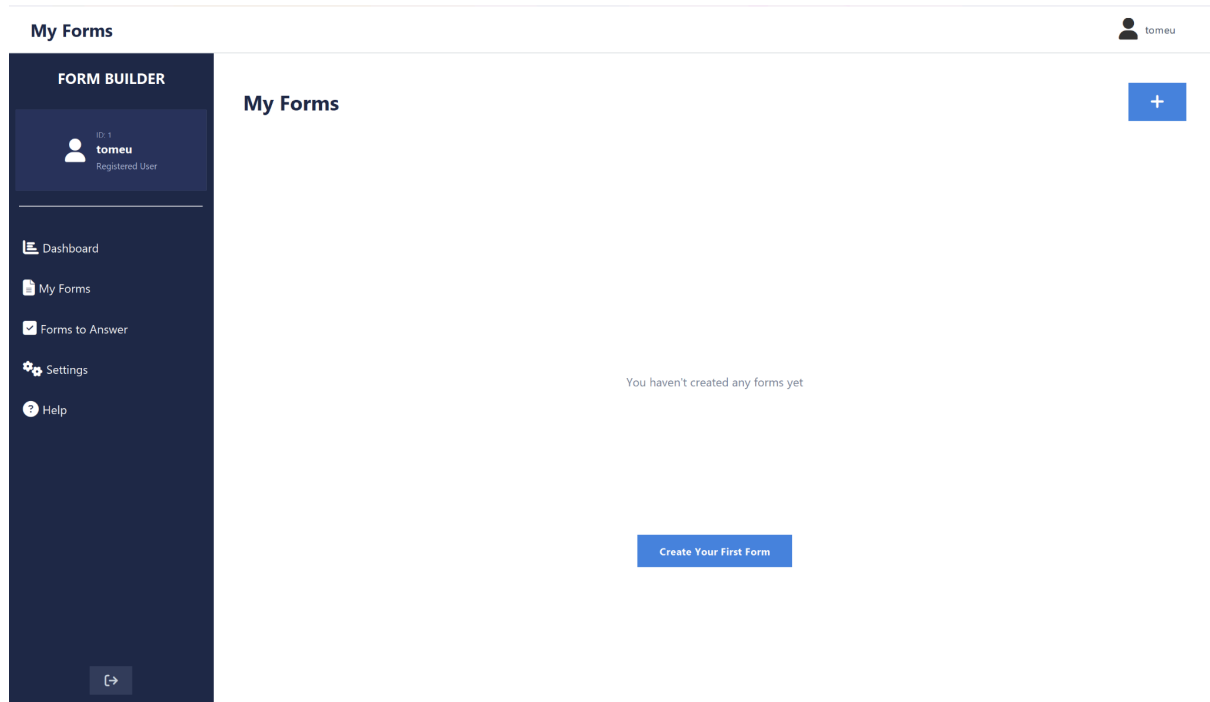

You will have access to the following functionalities:

- Create new form (+ symbol): creates a new form
- My Forms: access the view of forms in order to manage your owned forms (creating, editing, deleting, publishing, etc. See 2.4 Forms View)
- Forms to Answer: access the view of answering forms in order to answer any form available (See 2.7 Forms to Answer)
- Settings: access the account settings
- Help: access the help documentation
- Logout (symbol): signs out of the application to the log in view

2.4 Forms View

2.4.1 General information

When clicking in “My Forms” for the first time you will see the following image:

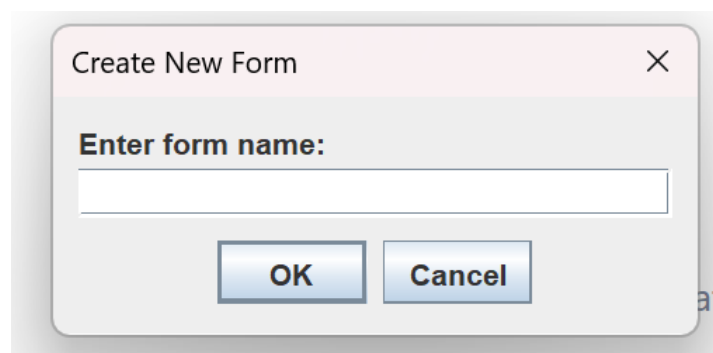

In this view, we have the following functions:

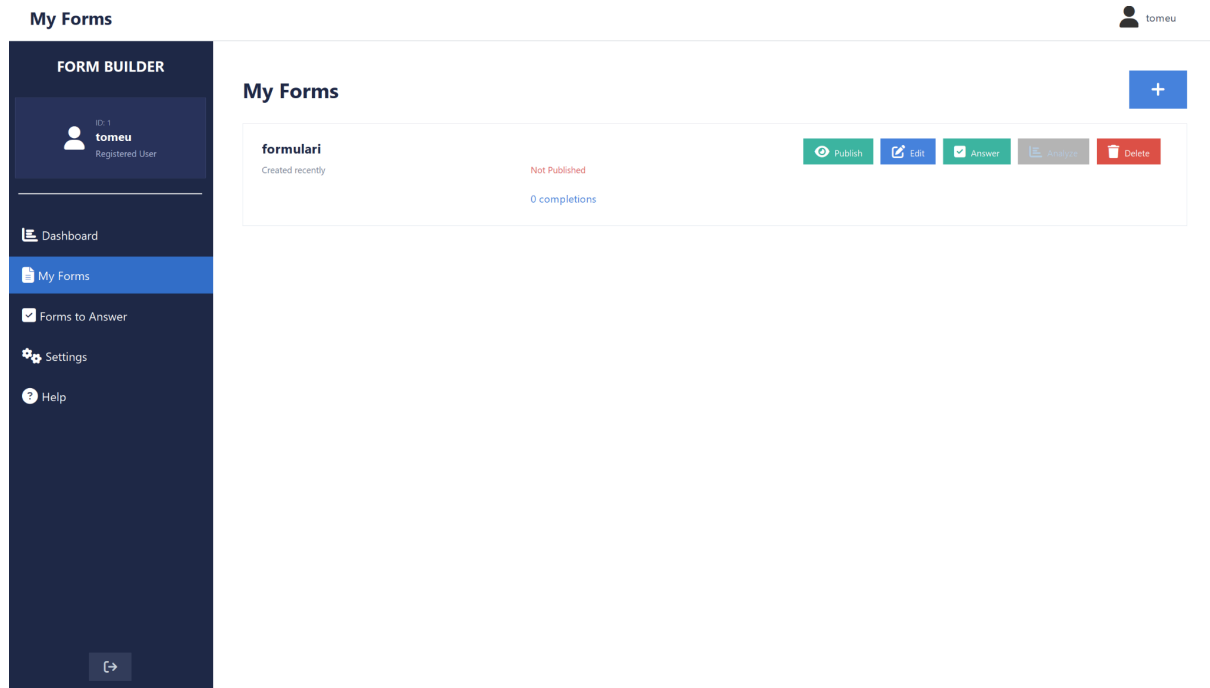

- “+”: Creates a new form
- “Create Your First Form” this option will only be shown if the user is not owning any form at the moment. It creates a new form.

2.4.2 Creating a Form

To create a form, click “+” or “Create Your First Form”. The following pop-up should appear asking for the form name:

After writing the name, click “ok” to confirm Form creation. Now, your My Forms page should look like this:

Now we have the following extended functionalities:

- Publish: publish the form. It will make the form visible to other users (they will be able to answer it).
- Edit: edit the form (create, edit and erase questions). See 2.5 Edit Form View.
- Answer: answer the form
- Analyze: perform the analysis of the form. See 2.10 “Analysis”.
- Delete: delete the form

2.5 Edit Form View

2.5.1 General Information

When clicking “edit” for a new form. We will see something like this:

The screenshot shows the 'Edit Form' interface. At the top, there is a header 'Edit Form' and an 'Exit' button. Below this, the 'Form Title' is 'formulari'. The 'Questions' section is empty. At the bottom, there is a status bar showing 'Questions: 0' and three buttons: 'Reorder Questions', '+ Add Question', and 'Save Changes'.

- Add Question: adds a new question
- Save Changes: save the changes made to the form and exit the “my forms” view

When some questions are added, there will also be the option to edit any of the question or delete it:

The screenshot shows the 'Questions' section with a single question 'Q1 - Free Text'. To the right of the question are 'Edit' and 'Delete' buttons.

2.5.2 Add Question

After clicking on “Add Question”, you will have to choose between one of the following options:

Free Text

Multiple Choice

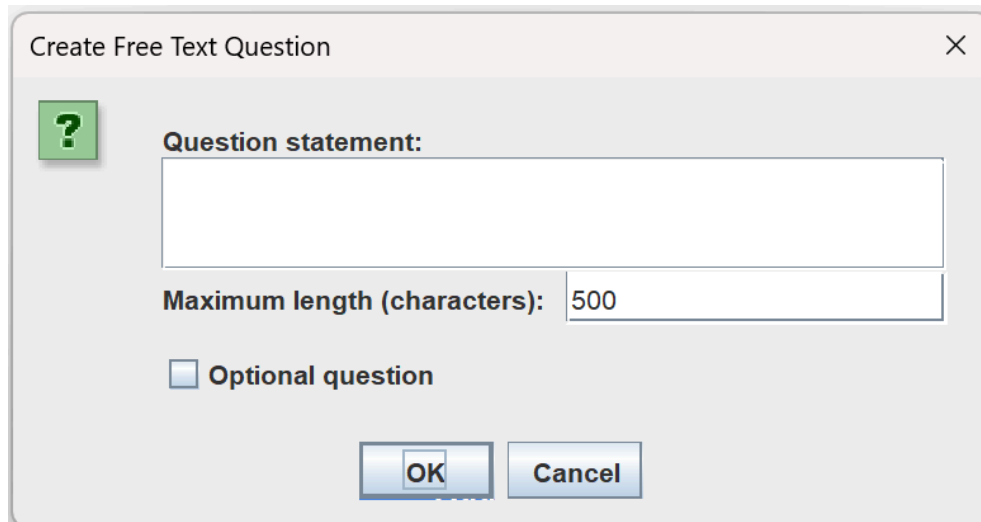

Numeric

Ordered Single Choice

For each type of question, a pop-up window will appear asking the user to insert the data and options of the question.

2.5.2.1 Free Question

This type of question lets the user respond with any text.

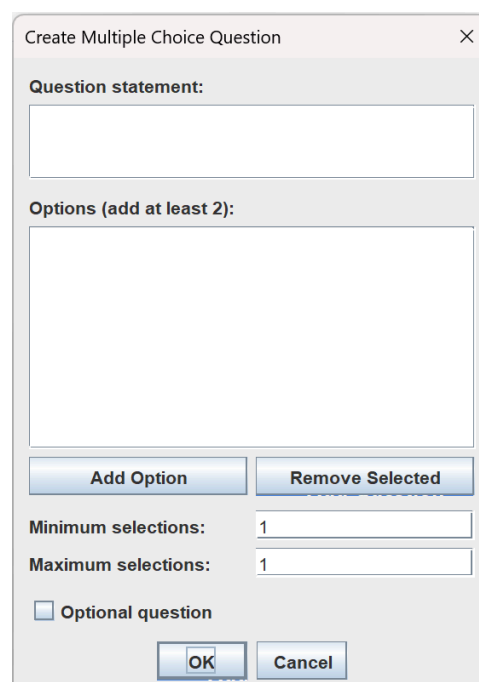

The dialog box is titled "Create Free Text Question" and has a close button (X) in the top right corner. On the left side, there is a green square icon with a white question mark. The main area contains a "Question statement:" label followed by a large text input field. Below this is a "Maximum length (characters):" label followed by a text input field containing the value "500". Further down is a checkbox labeled "Optional question". At the bottom, there are two buttons: "OK" and "Cancel".

Insert the required data and options:

- Question statement
- Maximum length: maximum length of the user response
- Optional question: if marked, the user will not be forced to answer this specific question

2.5.2.2 Multiple Choice

This type of question consists of a few options, the user will mark any of those options.

The dialog box is titled "Create Multiple Choice Question" and has a close button (X) in the top right corner. It contains a "Question statement:" label followed by a text input field. Below this is a section labeled "Options (add at least 2):" followed by a large text area for listing options. Under the options area are two buttons: "Add Option" and "Remove Selected". Below these are two labels: "Minimum selections:" and "Maximum selections:", each followed by a text input field containing the value "1". At the bottom, there is a checkbox labeled "Optional question" and two buttons: "OK" and "Cancel".

Insert the required data and options:

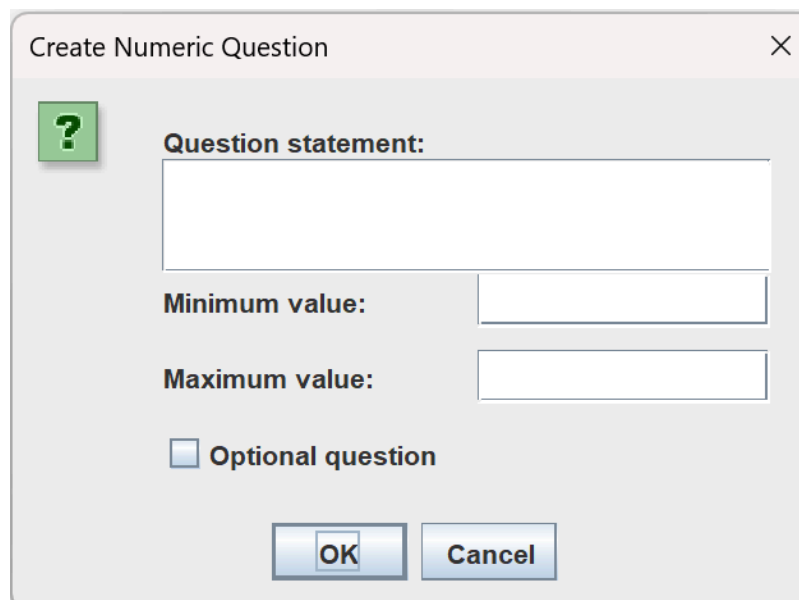

- Question statement
- Add option: add possible options
- Remove Selected: remove the option added
- Minimum/Maximum selections: number of options the user must mark, if minimum = maximum = 1 the question will just be a single selection question. If maximum is the number of options, it will be a multiple choice question.
- Optional question: if marked, the user will not be forced to answer this specific question

2.5.2.3 Numeric

This type of question lets users answer with a number.

Insert the required data and options:

- Question statement
- Minimum value: the user will be required to answer with a numerical value higher than “minimum value”
- Maximum value: the user will be required to answer with a numerical value lower than “maximum value”
- Optional question: if marked, the user will not be forced to answer this specific question

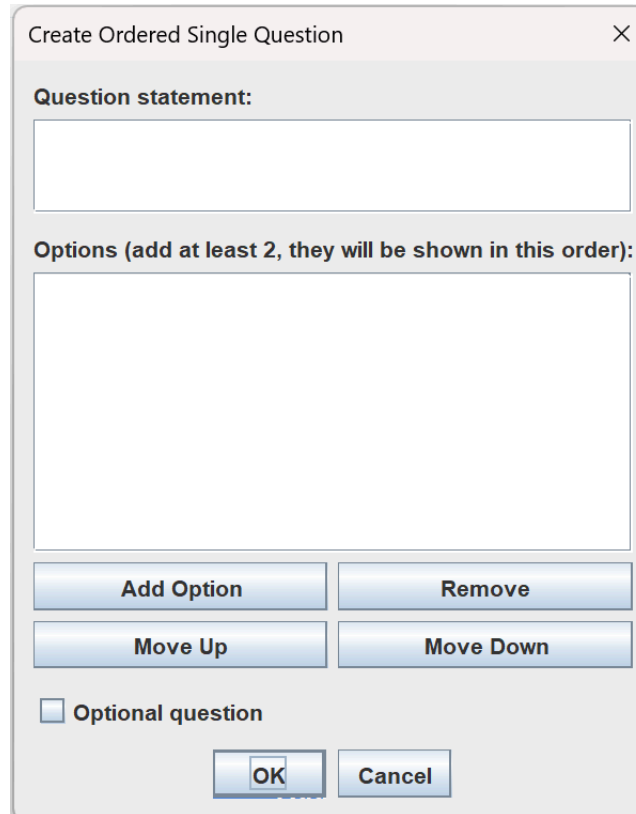

The image shows a dialog box titled "Create Numeric Question" with a close button (X) in the top right corner. On the left side, there is a green square icon containing a white question mark. To the right of this icon, the text "Question statement:" is followed by a large empty text input field. Below this, the text "Minimum value:" is followed by a smaller empty text input field. Further down, the text "Maximum value:" is followed by another smaller empty text input field. At the bottom left, there is a checkbox labeled "Optional question". At the bottom center, there are two buttons: "OK" and "Cancel".

2.5.2.4 Ordered Single Question

This question consists of a few ordered options, for example:

Question: how are you?

Options: 1 bad, 2 good, 3 very good

The screenshot shows a dialog box titled "Create Ordered Single Question" with a close button (X) in the top right corner. The dialog is divided into several sections:

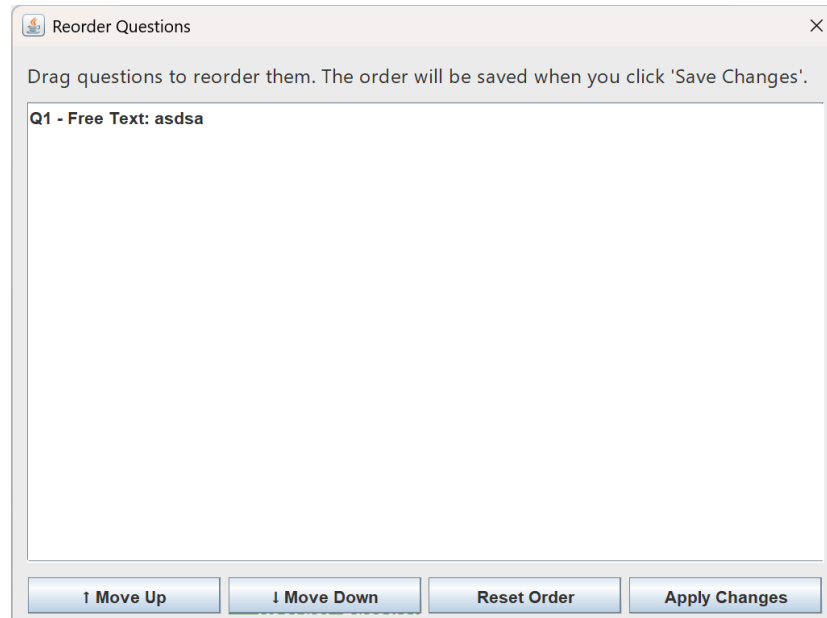

- Question statement:** A text input field for the question statement.
- Options (add at least 2, they will be shown in this order):** A large text area for listing options.
- Buttons:** Four buttons are arranged in a 2x2 grid: "Add Option", "Remove", "Move Up", and "Move Down".
- Optional question:** A checkbox labeled "Optional question".
- OK/Cancel:** Two buttons at the bottom for confirming or canceling the operation.

Insert the required data and options:

- Question statement
- Add Option: add a new option of the question
- Remove: remove the selected option
- Move Up/Move Down: reorder the options
- Optional question: if marked, the user will not be forced to answer this specific question

2.5.3 Reorder questions

The order shown in the edit view is the order in which the form will be answered, in order to change that order, click “Reorder Question”, the following pop-up should appear:

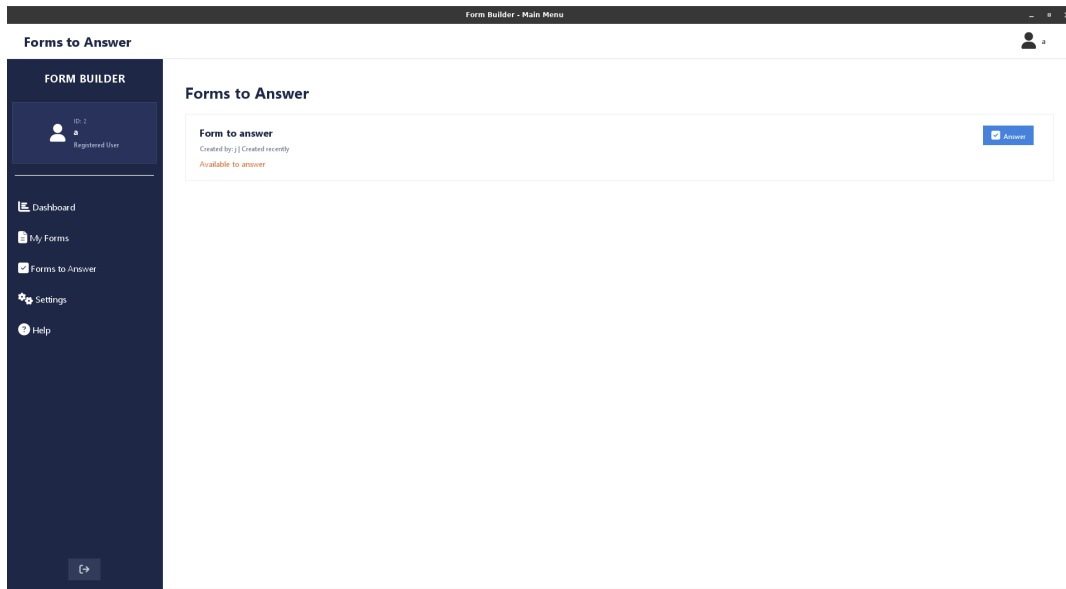

Options:

- Move Up: swap the selected question with the one on top of it.
- Move Down: swap the selected question with the one on the bottom of it.
- Reset Order: resets the original order.
- Apply Changes: saves the new order of the question and exits to the edit view.

2.6 Forms to Answer

2.6.1 General Information

To access and answer forms created by other users, click on “Forms to Answer” from the Main View. You will be directed to a list of all published forms available for answering.

From this view, you can:

- See your forms available for answering
- Click on any form to begin answering it
- See the creator of the form

2.6.2 Answering a Form

When you select a form to answer, you will see the following interface divided into three main sections:

The screenshot shows the 'Form to answer' window. The title bar says 'Form Builder - Form to answer'. The main area is titled 'Form to answer' and contains a question 'Q1 Explica les teves impresions'. Below the question is a large text input area. At the bottom of the window, there is a progress bar showing 'Progress: 1 of 3' and '33%'. To the right of the progress bar are 'Previous' and 'Next' buttons. A small text 'Max. 500 characters' is visible at the bottom right of the text input area.

Top Section – Form Information:

- Displays the form title
- Contains an "Exit" button to leave the answering session (with confirmation if unsaved answers exist)

Central Section – Question Display:

- Shows one question at a time using a card-based navigation system
- Questions appear in the exact order defined by the form creator
- Each question includes:
 - o Question number (e.g., "Q1", "Q2")
 - o Question statement in bold text
 - o Specific instructions based on question type
 - o Input field(s) appropriate to the question type

Bottom Section – Navigation & Progress:

- Progress bar showing current position (e.g., "Progress: 1 of 10")
- Visual progress indicator with percentage
- "Previous" button to go back to the previous question
- "Next" button to advance to the next question (changes to "Submit" on the last question)

2.6.3 Answering Different Question Types

The application supports four question types, each with specific input methods:

Free Text Questions:

- Display a large text area for typing responses
- Character counter showing maximum allowed length (if specified by form creator)
- Support for word wrap and multi-line responses

Numeric Questions:

- Show a numeric input field that only accepts numbers
- Range validation (minimum/maximum values if specified)
- Real-time validation to ensure numbers are within allowed range

Multiple Choice Questions:

- Display options as checkboxes (for multiple selections) or radio buttons (for single selection)
- Selection limits clearly indicated (e.g., "Select between 2 and 4 options")

- Visual feedback when hovering over options
- Automatic enforcement of minimum/maximum selection limits

Ordered Single Choice Questions:

- Present options as radio buttons in the specified order
- Allow selection of exactly one option
- Maintain the order defined by the form creator

2.6.4 Form Navigation & Validation

Forward Navigation:

- Click "Next" to proceed to the following question
- The system automatically validates required questions before allowing advancement
- Optional questions can be skipped without validation

Backward Navigation:

- Click "Previous" to return to any previous question
- Answers are preserved when navigating back and forth
- No validation required when moving backward

Real-time Validation:

- Required questions must be answered before proceeding
- Numeric values are validated against minimum/maximum ranges
- Text length is validated against character limits
- Selection counts are validated against minimum/maximum requirements

2.6.5 Form Submission

Final Review:

- On the last question, the "Next" button changes to "Submit"
- Clicking "Submit" displays a confirmation dialog

Submission Process:

1. All answers are collected from temporary storage
2. Each answer is saved to the database with appropriate formatting
3. Success confirmation message is displayed
4. You are automatically returned to the "Forms to Answer" list

The screenshot shows a web application window titled "Form Builder - Form to answer". The main content area is titled "Form to answer" and contains a question labeled "Q3 Part preferida" with the instruction "Select one option". There are three radio button options: "Persistencia", "Presentacio", and "Domine". A modal dialog box titled "Submit form" is overlaid on the question, asking "Are you sure you want to submit your responses?" with "Yes" and "No" buttons. At the bottom of the form, there is a progress bar showing "Progress: 3 of 3" and "100%", along with "Previous" and "Submit" buttons.

2.7 Settings

When clicking “Settings”, we will see the following page:

The screenshot shows the 'Settings' page of the 'FORM BUILDER' application. On the left is a dark sidebar with a user profile 'tomeu' (ID: 1, Registered User) and navigation links: Dashboard, My Forms, Forms to Answer, Settings (active), and Help. The main content area is titled 'Settings' and contains three sections: 'Account Information' (Username, Email, User ID, Account Type), 'Account Actions' (Change Username, Change Email, Change Password buttons), and 'Application Information' (About Form Builder button). On the right, a user summary shows 'tomeu' with email 'tomeu@gmail.com', ID '1', and status 'Registered'.

This page is mainly designed to configure the profile. In the top of the page, we can see all the current information of the profile, including: Username, Email, User ID and Account Type.

We have the following functions:

- Change Username
- Change Email
- Change Password

For each of these options, a pop-up window will appear asking for the new data:

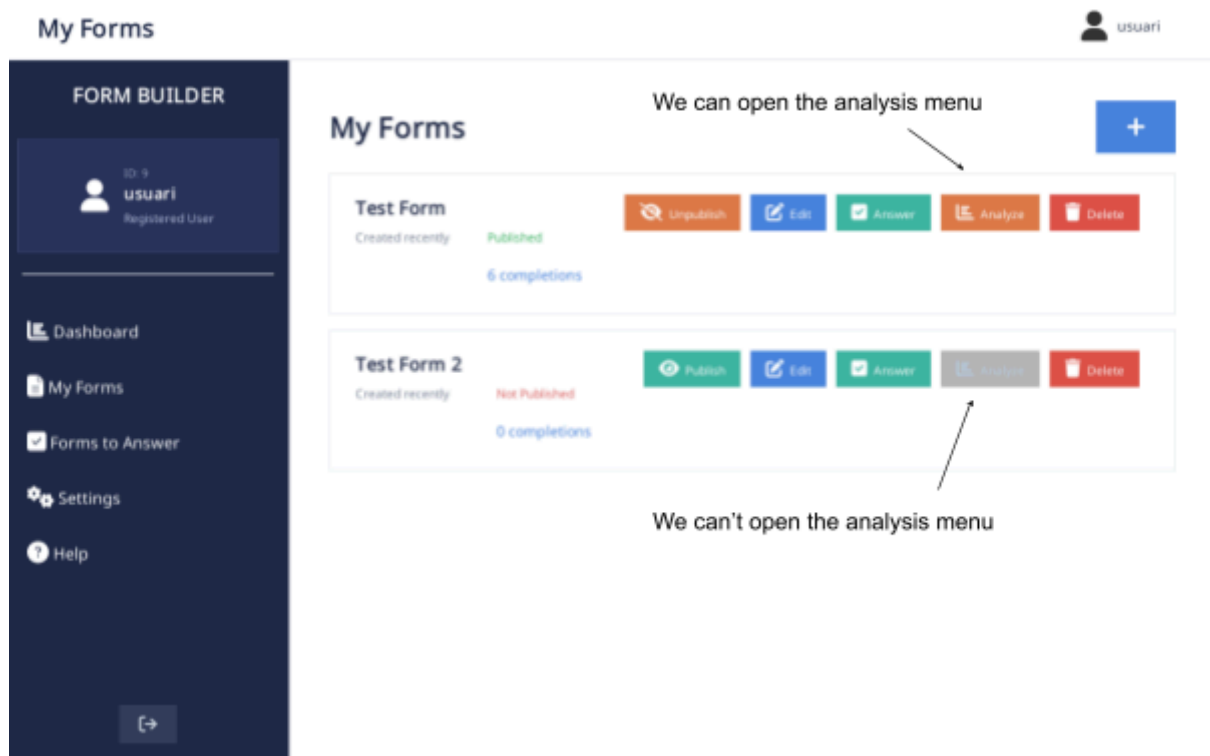

Three pop-up windows are shown. The 'Change Password' window has fields for 'Current Password:', 'New Password:', and 'Confirm New Password:', with 'OK' and 'Cancel' buttons at the bottom. The 'Change Email' window has a 'New Email:' field and 'OK' and 'Cancel' buttons. The 'Change Username' window has a 'New Username:' field and 'OK' and 'Cancel' buttons.

2.10 Analysis

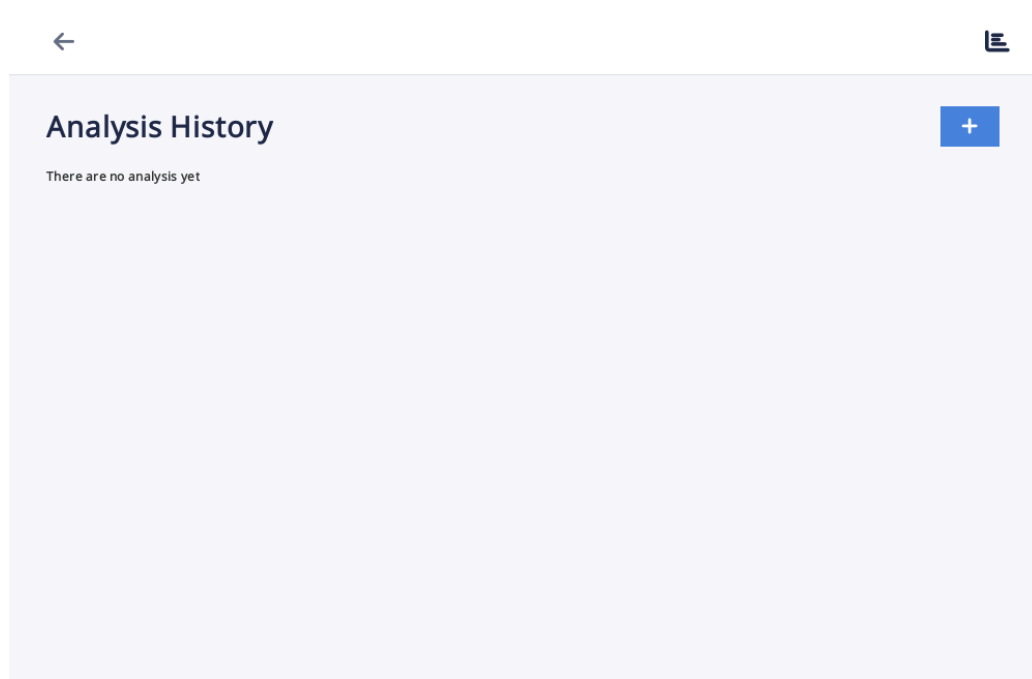

2.10.1 Opening the menu

When clicking on the “Analyze” option for a form in the My Forms section it opens up a new menu showing previous analysis of the chosen form. The form must be published to get to open this menu.

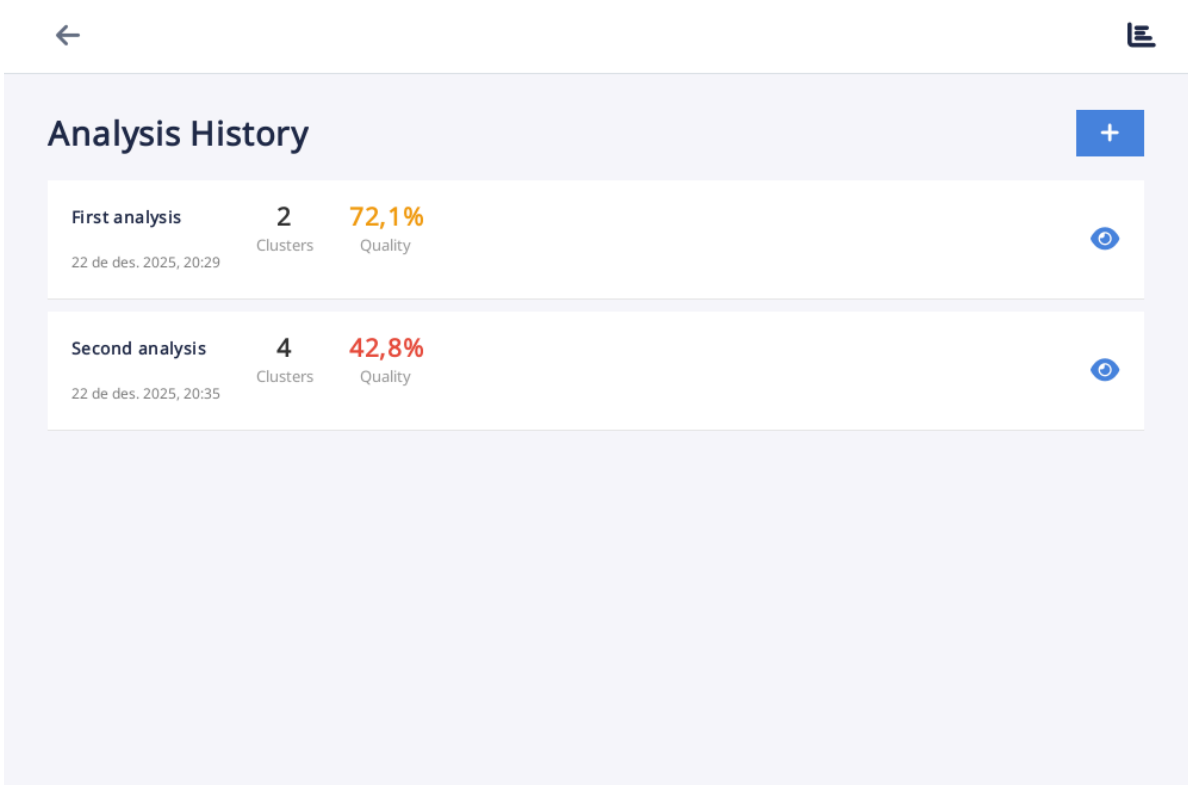

When the form is not published the button changes so as to show that it is not possible to open the Analysis menu.

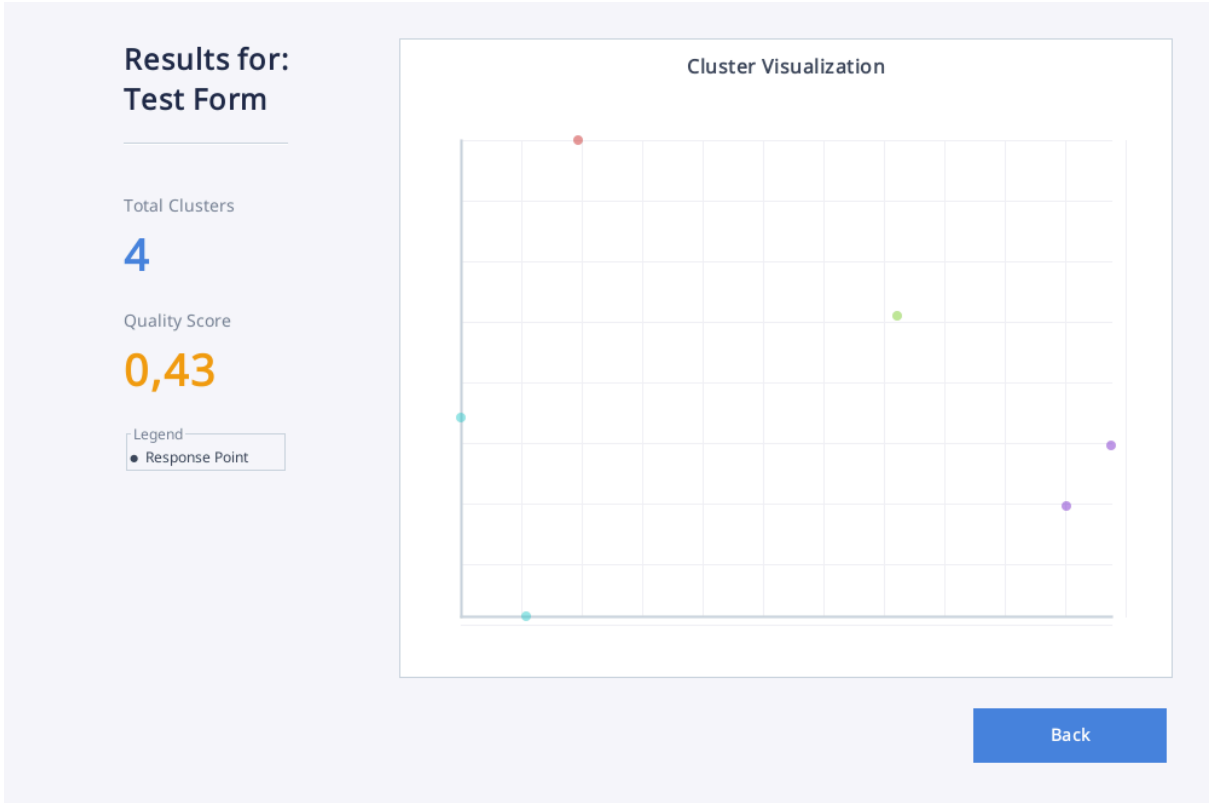

Opened menu:

When we have previously made an analysis it shows the following instead:

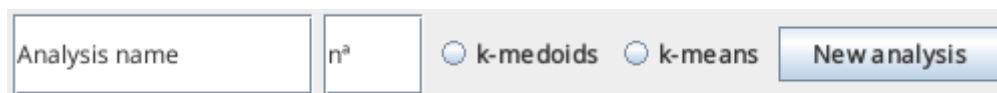

If we click on the eye icon on a previous analysis we get the following panel showing a visual representation of the clustering:

From this menu we can go back to the main menu by clicking on the back arrow on the top left corner.

2.10.2 Creating a new analysis

We can click on the + icon on the top right corner to create a new analysis. This opens up the following window:

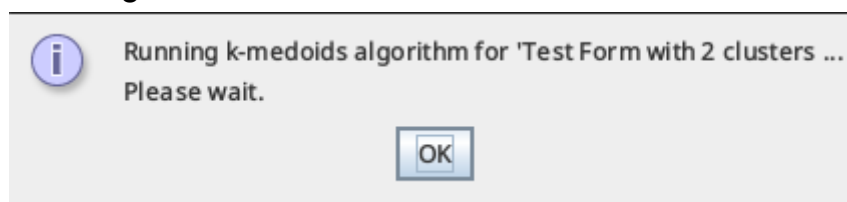

Analysis name n² ☐ k-medoids ☐ k-means New analysis

Where we can change the name to whatever name we want, give the number of clusters we want and select the algorithm we wish to use.

The name of the analysis has to be at most 15 characters long, the number of clusters must be strictly positive and an algorithm must be selected. If any of these requirements are not met it will cause an exception and a pop-up information panel will show what went wrong and an analysis won't be made but the creation window won't close.

Once we have put valid parameters on all the fields we can click the "New analysis" button to create a new analysis with the given parameters. This action will create a pop up which once closed shows the information of the newly created analysis as if it was opened from the menu just like this one, which says what algorithm has been chosen and the number of clusters.

It is important to note that an analysis can't be made if there are no answers to the form. If we attempt to create one it will trigger an exception and it will exit the creation process.
